Getting Started with OvrC
(once your new Clare gear is installed)

Create an Account

Navigate to **app.ovrc.com** and click **Create an Account**.

The website asks for your contact information. Please ensure that this is the information for the account owner.

Review the OvrC Terms of Use and Privacy Policy, then click **Sign Up**.

OvrC sends an activation email to confirm your account; navigate to your email service and click the link to continue.

Create Your First Customer

With your account created, you can now log in and add your first customer!

At the top of the page, click the **+ Add Customer** button.

Enter the customer's data at the top.

In the Location section, enter the name of the place ("Office" e.g.) and its address.

Don't worry about the **ISP, Job Code, Group Assignment** menu or **Add Location** button; you'll learn more about those later.
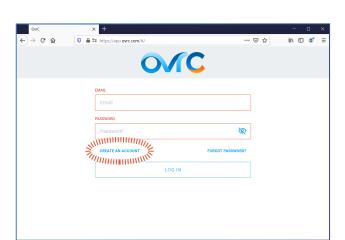

Review the terms and confirm that you have permission, then click **Save** at the bottom right.
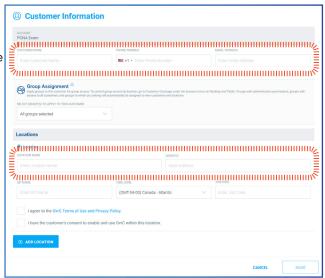

Add the OvrC Pro Hub

With the customer created, you can add your devices to your OvrC account. Ensure your Clare NVR and cameras are already on the network.

Connect your OvrC Hub to power. It boots up automatically. Once it has finished booting, connect it to your network.

From the customer's dashboard tab, click the **Add OvrC Pro Device** button in the blue Internet box. Enter the MAC address of your OvrC Hub (you can find it on a sticker on the box) and click **Find**. To confirm the device, enter its ST Number (also on the sticker).

The OvrC Hub then scans your network and automatically adds your Clare gear as well as any additional devices that it finds.
