

# Updating ClareVision Plus Camera and NVR Firmware Product Bulletin

#### Last modified: 01/06/21

### Introduction

To ensure an accurate performance, keep your ClareVision Plus camera and NVR firmware up to date. New features and functions are only accessible when using the latest firmware versions.

## **Updating firmware**

Follow the steps below to update your ClareVision Plus firmware.

Note: You will need the ClareVision Plus App.

#### To update your firmware:

1. Open the ClareVision Plus App on your Android smartphone or iOS device.

A list of CCTV devices displays.

2. A blue dot appears next to the name of a CCTV device, indicating the device needs attention.

**Note:** The blue dot indicates that a firmware update is available, but may also indicate another device status issue that requires attention.

3. Tap the camera/NVR's name.

The page displays the camera/NVR's settings. If a newer firmware is available, the blue dot appears next to the device version.
