

## RF Split Control Duplex Receptacle Wireless Control System – CL-TRR-X

### Installation Instructions

**Important:** Turn circuit breaker OFF or remove fuse(s) and test that power is off.

**Caution:** Use only copper wire with this device. This device must be properly grounded. Connect green or bare grounding wire from box to green-colored wire from device. To be installed by an electrician or qualified person in accordance with electrical codes.

#### To install:

Connect wires per wiring diagram as follows:

- Remove pre-stripped insulation on device wires.
- Strip wires in box 1/2”.
- Twist ends of stripped wires together as per schematic.
- Twist on wire connectors clockwise until secure.
- Connect green ground wire to bare wire, and mount to box with screws.

After completing successful installation LED on device will blink until programmed. For detailed programming instructions for your receptacle, refer to the manual that is included with your controller.

### Z-Wave Device Network Installation

After completing successful installation LED on device will blink until added to the Z-Wave network. To add the device, refer to the instruction manual for your controller and press the ON/OFF switch one time. Once added, the blue LED will stop blinking.

### FEDERAL COMMUNICATIONS COMMISSION INTERFERENCE STATEMENT

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- 1: This device may not cause harmful interference, and
- 2: This device must accept any interference received, including interference that may cause undesired operation.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**FCC CAUTION:** Any changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.
