Introduction

Note: If the Pioneer Blu-ray player loses power, it's NIC card shuts off. The device is shown as offline in Fusion. Simply turn the Blu-ray player on manually to restore connection. We recommend having battery backup for the Pioneer Blu-ray player.

The release of the Pioneer Blu-ray IP driver allows you to integrate Pioneer Blu-ray players (models listed below) with Clare Home over IP. Customers can now control their Pioneer Blu-ray through IP using the Clare Home Application.

No software or download is necessary. Simply connect the Pioneer Blu-ray player to the home network, and then add it in Fusion.

The Pioneer Blu-ray IP Driver supports the following Blu-ray players:

Note: The following models are supported, additional models may be compatible but have not been tested.

- BDP-09FD
- BDP-41FD
- BDP-52FD
- BDP-430

- BDP-23FD
- BDP-42FD
- BDP-62FD

- BDP-31FD
- BDP-53FD
- BDP-80FD

- BDP-33FD
- BDP-43FD
- BDP-140

Installation

Only qualified technicians should install and connect devices used with Clare Controls products. Refer to the installation instructions that came with your Pioneer Blu-ray player. Clare Controls does not assume any responsibility for damages caused by improper installation or connection to the network.

Notes

- You must set a static IP address for the Pioneer Blu-ray player.
- The Pioneer Blu-ray player must have Quick Start enabled.

To enable Quick Start for the Pioneer Blu-ray player:

1. Access the Pioneer Blu-ray player's menu, and then browse to Quick Start.

Initial Setup > Options > Quick Start

Note: Menu navigation may vary by model.

2. Set the Quick Start option to **On**.

This enables the Blu-ray player to be turned on while in standby mode.

3. Exit the Blu-ray menu.

Configuring in Fusion

Configure the Blu-ray player in Fusion to enable use with Clare Home and the Clare Controls UI.

To add the Pioneer Blu-ray player:

- 1. Access your project in Fusion.
- 2. Click the **Devices** tab, and then click the **New Device** button **①**. The Select Template dialog displays.

Doc ID - 1181 • Rev 01 2 / 9

- Browse to Pioneer Blu-ray IP Enabled Models (IP).
 Entertainment IP Devices > Blu-Ray Player > Pioneer Blu-ray IP Enabled Models (IP)
- 4. Click **OK**, the **Details** tab displays.
- 5. Enter a name and notes for the Blu-ray player.

6. Click the **Configure** tab.

Doc ID - 1181 • Rev 01 3 / 9

- 7. Enter the Blu-ray player's IP Address in the **Network Address** field, and then verify that the network port is set to 8102.
- 8. Click the **Save** button ...
- 9. Create a service for the Blu-ray player in Fusion.

Creating a Service

After installation, enabling Quick Start, and adding the device in Fusion, create the service for the Blu-ray player in Fusion.

To create a service for the Sony Blu-ray player:

1. Click the **Services** tab, and then click the **New Service Instance** button **①**. The New Service Instance dialog displays.

Doc ID - 1181 • Rev 01 4 / 9

- 2. Enter the name of the service in the **Name** field, select the area, and then click **Entertainment Service**.
- 3. Click **Next** to display the **Devices** tab.

- 4. In the left panel, select the devices you want to use in the service.
- In the right panel, set the values for each control point.Click the Value field to view the drop-down menu, and then select the device.
- 6. Click **Next** to display the **Scenes** tab.

Doc ID - 1181 • Rev 01 5 / 9

To configure the scene:

1. In the **Start Sequence** field, select **Create new Scene**, and then click the **New Device Operation** button •.

Configure the Device, Function, and Operation drop-down menus with the following values.

Device: Select the Pioneer Blu-ray player.

Function: Select the desired function for the Blu-ray player – for example, Switch.

Operation: The desired function state – for example, Turn On.

3. Repeat steps 1 and 2 for each device.

Note: Steps 1 and 2 can be repeated to make the selected device perform another action. For example, the Blu-ray player turns on for the first action, and then 5 seconds later it displays the Title Menu.

4. Select the **Stop Sequence** field, select **Create new Scene**, and then click the **New Device Operation** button

Configure the Device, Function, and Operation drop-down menus with the desired values.

- 6. Repeat steps 4 and 5 for each device.
- 7. Click Finish.
- 8. Deploy your project.

User interface example

Once you have configured and deployed your project, access the entertainment service created for the projector.

To access the service in the Clare Controls App:

- 1. Tap C to run the app, and then select your user space.
- 2. Tap to view the inventory page.
- 1. Tap Entertainment.

Doc ID - 1181 • Rev 01 7 / 9

2. Tap the area that you want to access – for example, Game Room.

– or –

Tap •• to add the area to your space. Return to your space and tap •• to access the service.

Note: We only recommend adding the service to your space if the service is regularly used.

- 3. The area displays.
- 4. Tap sources in the top-right corner, and then tap Watch Blu-ray.

5. The service entertainment remote displays.

Doc ID - 1181 • Rev 01 8 / 9

Note: The buttons on the virtual Clare Controls remote correspond with the configured TV and Pioneer Blu-ray control points.
